

A Skills Framework rates the signal strength.

Definitions of Credential Types

Attendance

Attending an event to gain skill exposure (e.g., conferences, webinars)

Learning

Structured, unmeasured learning experiences (e.g., self-led courses, product knowledge, trainings)

Validation

Measured and validated learning experiences (e.g., learning and assessments)

Experience

Real-world demonstration of skills validated by managers, internal experts, and AI frameworks. (e.g., volunteer courses, large-scale projects)

Certification

Industry recognized, rigorously validated achievement (e.g., industry certifications, license, terminal credential)

Input		Beg	Ad Beg	Competent	Proficient	Expert
Type of credential	Attendance	1	1	2	2	3
	Learning	2	4	6	8	10
	Validation	4	8	12	16	20
	Experience	8	16	24	32	40
	Certification	10	20	30	40	50
Work experience	Current role	20	40	60	80	100
	Past roles	10	20	30	40	50
Education	Education	12	24	36	48	62

Primary / Secondary Skills:

Credentials: (1-5 total per credential) First 2 skills scored at 100%, Bottom 3 skills scored at 50%

Job Roles: (8 total per role) First 3 skills scored at 100%, Bottom 5 skills scored at 50%

Education: (8 total per degree) First 3 skills scored at 100%, Bottom 5 skills scored at 50%

Points are assigned for each input and summed to create Skills Profile
Skills are scored up to 100 (can exceed)

Definitions of proficiency levels

(Dreyfus & Dreyfus, 1980)

Beginner: Neither background knowledge nor prior experience required; accessible to novices.

Advanced Beginner: Basic understanding of topic required; accessible to beginners.

Competent: Some prior experience and generalized understanding required; accessible to those familiar with topic.

Proficient: Prior experience and knowledge required; accessible to those who can make decisions on topic.

Expert: Advanced experience and knowledge required; accessible to those who can adapt and innovate in the domain.

Credential proficiency levels are based on assumptions about the level of expertise required to complete the credential.

Work Experience proficiency levels are based on O*Net database score.

Education proficiency levels are based on degree level.

Beginner: Certificate (not credentialed)
Ad Beginner: Associate/Trade degree
Competent: Bachelor's
Proficient: Master's
Expert: Doctoral
